From: (b) (7)(C), (b) /R6/USEPA/US

To: R6/USEPA/US@EPA

History: This message has been replied to.

AI 67572 (DuPont - Burnside)
 (b) (7)(C), (b) FYI - The RQ for SO2 is 500 # in 24 hr period. For SO3 it is 100#. For
 (b) (7)(C) Good information; thank you very much for handling so quickly. (g) (q)
 (g) (q)

FYI - (g) (q)

The RQ for SO2 is 500 # in 24 hr period. For SO3 it is 100#. For H2SO4 (sulfuric acid), it is 1000#.

<http://www.epa.gov/oem/docs/er/355table01.pdf>

So if they are having leaks that exceed the RQ, they have to report the incidents to LDEQ per LAC 33: Chapter 39 (and there is also a reference in LAC 33:III for air that refers to Chptr 39).

Their fugitive emission point in their permit is only permitted for emissions of VOCs (0.19 lbs/hr; 0.83 tons/yr) and H2SO4 (0.12 lbs/hr; 0.52 tpy). Thus, just over 1000 lbs of H2SO4 can be released as fugitives each year. But they don't have any emission limit for SO3 (sulfur trioxide) which I would think they should, since they would be subject to reporting releases over 100 lbs if they occur.

SO3 converts to H2SO4 easily when water is present (humidity in LA!!!), so maybe they are assuming all released convert to H2SO4 by the time it meets the fenceline, thus they are subject to the higher reporting requirement.

(b) (7)(C), (b) (6)

Many facilities use internal tracking system for incidents, whether or not they exceed an RQ. Many use a system called IMPACT.

(b) (7)(C), (b) (6) nance reco

Many companies have automated systems to track work orders and repairs as well as preventative maintenance of systems. Those records can be requested and looked at have any know issues with the equipment (sometimes the wrong type of metal is used in a p ment and a facility finds out about it....rather than take unit down & change, they just "watch" frequent inspections.) (c) (1) (q)

I've asked LDEQ to send me the 2011 Annual Comp Cert since it is not on EDMS.

Subject: Dupont plant shut down [REDACTED] (c)(7)(q) (g) (q)

Hello all,

[REDACTED] has learned that DEQ came to the Dupont site last night, saw vacuum hoses and said they would return in the morning;

(q)

Employees were told this morning by plant manager that Dupont is shutting down the plant and sending all Dupont employees home and KBR (long time resident contractor) is coming to fix everything.

I have seen additional documents produced by Dupont in the employment case which pertain to tom Miller's spin on [REDACTED] complaints about the leaks. I will send them to you asap.

We will continue to be in depositions today in the employment retaliation case based on voicing concerns over racial discrimination.

Cc: [REDACTED] (USALAM); [REDACTED] (USALAM)

Subject: RE: Dupont plant shut down

[REDACTED]

[REDACTED] has since learned that the [REDACTED] (b) (7)(C), (b) (6) was only threatening to close down the plant and send everyone home but that had not yet happened as of earlier this evening. Word has it the DEQ was at the site for 2 hours last night looking for pressure going to the CIP and the HIP.

[REDACTED] was told that the [REDACTED] (b) (7)(C), (b) (6) apparently called a meeting purportedly to talk about bonuses and instead said that when they (DEQ) comes looking for "numbers", it's an inside job and "it's all over one asshole." He is reported to have said "if it were up to him he would shut the M___ Fu___ plant down and send everybody home and that he's going to call Wilmington and let them decide.

Thanks,

[REDACTED]

Hi all,

Please see below information [REDACTED] received from [REDACTED] (b) (7)(C), (b) (6) regarding a DEQ visit to Dupont.

[REDACTED]

----- Original Message -----

Subject: DEQ

From: [REDACTED] <[REDACTED] yahoo.com>

Date: Mon, July 02, 2012 1:41 pm

To: [REDACTED] <[REDACTED] (b) (7)(C), (b) (6) law.com>, "[REDACTED] cox.net" <[REDACTED] cox.net>

[REDACTED] (b) (7) (C), (b) (6) heard that DEQ came out and had a meeting with [REDACTED] and [REDACTED] (b) (7)(C), (b) (6) [REDACTED]. Not sure what was discussed only that they wanted copies of all the gas leaks that were reported and that DuPont thinks everything went fine. They are shutting the plant down again tomorrow though, they are saying to replace a river water pump.

Hi all,

[REDACTED] wanted to pass along the following update:

About 45 minutes ago, [REDACTED] and [REDACTED] who are working tonight, apparently called [REDACTED] (most experienced operator at the plant) saying there is a really bad leak at the plant tonight; they think it is coming from the CIP and another location.

[REDACTED] reportedly told them to cut the plant "way back". Records may reflect the plant being cut back tonight.

Thanks,

[REDACTED]

[REDACTED] called me today and said that they shutdown Thursday but only changed out a riverwater pump and never even tried to weld any of the leaks, all they did was adjusted the hoses and every time it rains the hoses are still failing so that gas continuous to escape. They had to call KBR out on Friday again to adjust the hoses.

[REDACTED]

[REDACTED]

[REDACTED] that they should not worry about DEQ that he was handling DEQ that during the second visit they went away with a good understanding of how DuPont was taking care of the leaks and that it was only a disgruntled former employee who had been calling them about Leaks getting off site. [REDACTED] said also, that [REDACTED] understood there was a lot of fear about the legal situation going on but [REDACTED] was handling that as well for them not to worry about any of that either, just to focus on their jobs.

They are planning to make another shutdown in the future to try again to fix some more of the leaks but for now they are still running with the vacuum hoses in place.

[REDACTED],

[REDACTED] has learned the following information tonight from [REDACTED] at Dupont:

[REDACTED] said that they are taking a few hour shutdown tomorrow to try to patch up some more of the leaks. There is no expectation that they will get all of them fixed so they are going to come back up and run with more vacuum hoses and try to suck up as much of the leaks as they can. [REDACTED] said there were several more occasions where the hoses had failed over the last couple weeks mostly after the rain storms.

Thanks,

[REDACTED]

█ has heard Dupont is documenting that the Spent Acid spill that got into the 005 LPDES outfall was only 30 gallons which would make it just under the 50 gallon spill limit. █ said it was clearly hundreds of gallons, as the sump under the tankcar holds an estimated 500 gallons and has a pump to pump it out as it is filling. But the pump could not keep up and the acid flowed about 50 yards to the drainage ditch. So, it had to be several hundred gallons or more. They did a formal investigation and it seems a guy by the name of "█" who they hired earlier in the year was responsible for not checking to see if there was a gasket on the hose when █ hooked it up and started it remotely from the control room sometime later and no one went out to check it for 3 hours.

Subject: Dupont - apparent large release tonight

Hi all,

[REDACTED] has been told that there was a large release tonight at Dupont. See below from [REDACTED] this evening:

Tonight, I got a call from [REDACTED] (no longer employed at Dupont) who was told by [REDACTED] (still employed) that something bad happened while they were unloading a Spent Sulfuric Tankcar earlier this evening. In fact, [REDACTED] said that [REDACTED] called [REDACTED] to report to [REDACTED] that the tankcar loader had blown nearly a whole car off onto the ground somehow. There is Spent Acid in the plant drainage system (LPDES 005) water outfall to the ditches that drain off the site, this alone would indicate to me that the spill would be in the hundreds of gallons. This product includes hydrocarbons such as oil, light fuel, (often Benzene) and other organics mixed in with Sulfuric Acid. If it is as bad as they indicate it would seem to be a category "A" release.

[REDACTED] does not have information that would indicate whether or not this was reported to DEQ.

Thank you for your continued attention to this matter,

[REDACTED]

Subject: Dupont - leak update

[REDACTED] and (b) (7)(C), (b) (6),

[REDACTED] has learned the following information tonight from [REDACTED]
[REDACTED] at Dupont:

[REDACTED] said that they are taking a few hour shutdown tomorrow to try to patch up some more of the leaks. There is no expectation that they will get all of them fixed so they are going to come back up and run with more vacuum hoses and try to suck up as much of the leaks as they can. [REDACTED] said there were several more occasions where the hoses had failed over the last couple weeks mostly after the rain storms.

Thanks,

[REDACTED]
